Description

The SURE5.0 Acceleration Programme 2 aims to help you to make your **production processes more sustainable, resilient and human-centric**

€10,000

Value of assessments and tailored services

€50,000/SME

Equity-free funding to implement your transition plan
Total budget = €2.6 Million

Our goal is to facilitate your Industry 5.0 transition

What does this mean?

Human-centricity

Empower your employees by upgrading their skills to adapt to novel, digital tools

Sustainability

Transition to circular economy based on reduced waste and environmentally sustainable, innovative business model

Resilience

Adopt digitalization faster by establishing the production adaptable to change and flexible business process

Beneficiaries

Participation in the SURE5.0 Acceleration Programme II is restricted to companies that comply with **ALL the following conditions:**

Being an SME, according to the [European Commission Recommendation 2003/361/EC](#) and the [SME qualification guide](#).

SMEs established in the European Union or EU Associated Countries.

SMEs operating in the **Mobility, Transport & Automotive, Aerospace & Defence, and Electronics** manufacturing value in need of adopting technologies or services for industry 5.0 transition.

Beneficiaries

WHO IS ELIGIBLE

- Manufacturing Companies
- Producers of at least one product
- Assemblers if they sell the product afterwards
- Software and producer if they focus on the production part of their company
- Within our three ecosystems

WHO IS NOT ELIGIBLE

- No link with the manufacturing process
- Non producers
- Service providers only
- Software only
- Not in our industrial ecosystems

What do we offer?

The Acceleration Programme II support will be provided in two phases through different tailored services and funding, based on your specific technological, business and personnel needs:

Phase 1 - Assess & Recommend

Individual assessment and roadmap design

Analysis of your business model and manufacturing process, identifying gaps and possible advanced technological solutions to cover them. This individual assessment will be the base for your 5.0 roadmap design.

Investment Readiness Support

Companies will be evaluated and categorised into three levels:

- Investment ready
- Almost ready
- Not ready

According to that, they will receive recommendations.

Training activities

Compulsory module on Industry 5.0 covering: The principles of sustainability, human-centricity and resilience; main challenges identified in our target industrial ecosystems; success stories and their practical application on different kind of businesses.

Social innovation and human-centricity

Companies will be provided with a “Guide for social innovators”. Later, they will receive a training course about how to elaborate a business model addressing more human-centric and social approaches.

Community of Practice of Alliance

Companies will be invited to join this LinkedIn group, which aims to foster exchange and experience in the field of industry 5.0, as well as to promote networking activities.

What do we offer?

Phase 2 - Business Transformation & Resilience

Equity-free funding of up to EUR 50k per SME

Companies will be provided with funding for the implementation of their industry 5.0 transition plans. At least 60% of this grant must be used to hire supporting experts included in our Catalogue of Complimentary Service Providers.

Investment Readiness Support

Companies will be provided with ad-hoc business support services such as business modelling, planning, financial assessment or funds scouting.

Training activities

During phase 2, companies will be offered other on-demand training modules covering both technological and innovation topics. Check our Catalogue of services to have the full list of courses and content.

Social innovation and human-centricity

A session will be organised to introduce the Social Innovation Tournament and other similar funding opportunities.

Advanced technological services

Interested companies will have the opportunity to be provided with technological individual assessments and/or proof-of concept testing.
